

Everyone, Meet

BRYAN BOYE

Bryan comes to YBI a proud native of the Mahoning Valley having been raised in Warren, Ohio. After graduating from Howland High school, Bryan received his Bachelor's degree in Business Pre-law from Bowling Green State University. He subsequently spent eight years working within the automotive industry, first in Ohio and later in San Diego, California, before relocating to Vancouver, British Columbia.

While in Vancouver, Bryan co-founded RunBuggy, a platform that has revolutionized the automobile transportation industry by offering the largest open marketplace in North America. RunBuggy operates in all 48 contiguous states and Canada and has an extensive network of more than 10,000 transportation providers and partnerships with the leading names in the automotive industry.

Bryan is a versatile leader with a broad range of expertise, including product development, intellectual property, cyber security, operations, go-to-market strategy, legal affairs, and more. Throughout the growth of RunBuggy, Bryan successfully established and managed several departments, making him an asset for start-ups looking to scale. He recently moved back to Northeast Ohio to be closer to family and began looking for ways to give back to his community. He joined YBI's team of EIRs to help young companies navigate and hopefully avoid some of the difficulties of starting a business from scratch.
